No. of Functional Features Included in the Solution

Date	28 September 2026
Team ID	SWTID-2026-3161
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Field-Value Based Record Restriction	Restricts record access depending on the value of a field in the record.	ACL Script	Done	1
2	Role-Based Access Check	Combines user role validation with the field-value condition.	Roles + ACL	Done	1
3	Reusable Access-Check Script Include	Access-check logic kept in one Script Include and called from ACL scripts.	Script Include	Done	0.5
4	Read / Write Operation Control	Separate ACLs control who can read and who can write restricted records.	ACL (Operations)	Done	0.5
5	Default Deny on Error	Access is denied if the condition is not met or the script fails.	ACL Script / Error Handling	Done	0.5
6	User Impersonation Testing	Access verified by impersonating users with different roles.	Testing	Done	0.5
7	Extend ACL to Other Tables	Apply the same field-based restriction to additional tables.	Table / ACL	Pending	0.5
8	Automated Test Cases	Add automated tests for edge scenarios.	Test Script	Pending	0.5

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	6
Core / Must-Have Features	5
Additional / Nice-to-Have Features	3
Features Tested & Verified	6

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features

1	User Interface (UI)	1	Read / write control on records shown in list and form views
2	Backend / Logic	3	Reusable Script Include, default deny on error, automated tests
3	Database / Storage	1	Extending the field-based restriction to other tables
4	API / Integration	0	Not applicable for this project
5	Security / Authentication	3	Field-value restriction, role-based check, impersonation testing
